# BeyondTrust Expertise

**Access control without pitfalls or compromise**

In today's reality, where organizations must manage a growing number of access points, BeyondTrust delivers proven capabilities to block threats, manage remote access, and audit activity—all within a unified environment.

## Precicom

IT GOVERNANCE, CYBERSECURITY, MANAGED SERVICES AND INNOVATION

# Strengthen your security with guided deployment

---

Implementing BeyondTrust means aligning access governance with your business objectives.

Our experts ensure the platform integrates seamlessly with your systems and processes, covering:

- Mapping of critical access (internal and third-party)
- Integration with your existing tools (SIEM, directories, etc.)
- Automation of access requests and approvals
- Targeted training for administrators and internal IT teams

Looking for experts you can rely on?  
We've got you covered.

---

---

---

Our clients have seen a 60%  
reduction in incidents related  
to privileged access within six  
months of implementation.
