Tenable Expertise

Unlock the next level of digital resilience

Tenable Delivers Preventive Cybersecurity Solutions Powered by AI
By providing optimal visibility into attack surfaces, the platform has everything it takes to strengthen an organization's posture against cyber risks. With our expertise, you can harness this intelligence to stay ahead of vulnerabilities—before they turn into entry points.

Precicom

IT GOVERNANCE, CYBERSECURITY, MANAGED SERVICES AND INNOVATION

Entrust your vulnerability analysis and remediation to experts

Cyberthreats are constantly evolving and can quickly become a challenge for managers and internal IT teams. When properly deployed, understood, and configured, the Tenable platform gives you greater visibility and faster response capabilities.

Our expertise ensures:

- Strategic deployment of Tenable.io or Tenable.sc
- Configuration of scan rules and risk policies
- Prioritization of vulnerabilities based on real-world threats
- Integration with ticketing systems and SIEM tools

Looking for experts you can rely on?
We've got you covered.

We work closely with your teams to optimize the implementation process of the Tenable platform, its products, and solutions, without slowing down operations.
